## E12 Electric Brick Making Machine

Our E12 Electric Brick Making Machine is the smallest of our egg-laying type machines. It can compact the aggregate either manually or through vibration, depending on which option the client requires. The E12 Egg-Laying Type Brick Making Machine produces an excellent quality brick, block & paver. And is most popular in rural areas where electricity and fuel are not easily available, as it can easily be supplied with either a diesel engine or generator.

<b>Specification:</b>				<b>With motor: 1min/drop</b>	<b>Without motor: 2min/drop</b>
<b>Vibrator Drive Options</b>	<b>Electric 220V</b>	<b>9 Inch Cavity Block</b>	<b>1 per drop</b>	<b>500 per day</b>	<b>250 per day</b>
